Title: Beaubien Family History  
Date: 1859 - 1974

To each of you who receive a copy of the family "tree" may think of it as a jig-saw puzzle. It is. Also a cross word puzzle. There are as many names connected to the main trunk, as many branches and so large, it would not be hard to find the link like a puzzle. This is a very easy part of it. There are branches of the family (Baubien) in France, Russia, Italy, Spain, and many others that I haven't even touched. Maybe some of the documents of this part of the Baubien's are put some one of this report. On some of these pages, which are numbered 1-10, etc., you will find other numbers in a certain family (2-10, etc.). Each these numbers with the corresponding numbers on page 1, and you won't get lost. Some people were married more than once, and some were adopted. Each of these will be noted on the family page with this note. I have done my best to make this report as complete, and accurate as possible.

Remember that and several way differ, depending on who kept them and how accurate they were kept. Some say questions and disagree with part or all of this report. But those who furnished me with the information, which are right and I'm not going to disagree with them (I want to keep up only). They are much closer to this family than I am.
